Summerville, SC -- To help LECs realize the full access charges to which they're entitled, Tele-Tech Services is offering free, a "Quick Guide to Increasing Access Revenue Using MTA Data." This guide is a tutorial on overcoming the problems inherent in billing reciprocal compensation and/or access charges to wireless carriers.

Included in this guide are:

- Instructions on determining once and-for-all whether a wireless originated call is "local";
- Solutions for reducing "phantom" traffic; and
- Solutions for determining the geographic location of the wireless caller at the time the call is placed

"Quick Guide to Increasing Access Revenue Using MTA Data" is FREE and available for download at <http://www.tariffs.com/MTAGuide.html>.
